820+

Successful projects

most part of our regular customers

Working with us you get:

Reliable partner 

Detailed work plan 

Exact terms 

Strong technical support 

Perfectionism in the details 

Turnkey project 

Our working methods

The principles that we follow when developing a project

Development of a website that brings results to the customer

It is in our interests to develop an effective website for you that will bring you a lot of income, because only in this case we can talk about fruitful, joint cooperation.

Exact price for project launch

After clarifying all the details we need, we are able to announce the exact cost of the work carried out to launch your project/website.

Active support of the product

Even after the launch of your project, we offer useful improvements for it that will help make it perfect.

Fixed terms

For each stage of development, we agree with you the exact date of completion. This works correctly only if the customer can quickly respond to our messages and requests.

Individual solution

Setting up the admin panel of your site is done individually. If necessary, we provide training on its use.

Our services

We offer high-quality and efficient IT services for you and your business. To provide these services, we use our accumulated experience, which has been consolidated by many years of work in the IT field. When you see the result of our work, you will be pleasantly surprised!

Development stages

Step-by-step instructions for developing a successful project

1

Filling out the brief

The customer fills out a short brief on our website xsort.md/en/brief, thus describing his project in a thesis.

2

Evaluation and commercial offer

We study that short brief filled by the Customer, organize a commercial offer and draw up an estimated cost of the project.

3

Studying the tech. specs doc

We conduct a thorough analysis of the customer's tech. specs and announce the exact cost of the project. If the customer does not have a tech. specs, we offer a separate service for its preparation. In further work, we subtract the cost of the tech. specs from the total cost of the project.

4

Contract signing and advance payment

When the parties have agreed on a commercial offer and are ready to start cooperation, a contract is concluded and an advance payment (50%) is made.

5

Content collection

This stage is carried out by the Customer, based on the content plan prepared by the Contractor.

6

Website prototype preparation

Based on your concepts, designers analyze your target audience, think over User Flow and implement a UX prototype of your site.

7

Home page design

After the approval of the UX prototype, our designers begin to develop styles and add UI elements to the main page of the site, after which it is submitted to the Customer for approval.

8

Design of basic and other pages

The next step, after confirming the main page, designers begin to develop the design of all other pages of the project.

9

Website layout – Front-end development

Our coders translate the approved design into code using modern technologies, while making it fully responsive for mobile devices.

Development Stages - Part 2

10

Programming - Back-end development

Programming the site and creating a convenient administrative panel to manage it.

11

Filling the site with content

We fill the site with the content you provide, so that it seems complete already at the first launch.

12

Website testing

At this stage, a thorough testing of the work of adaptability, loading and sending site forms is carried out. The site is updated as necessary.

13

Hosting and domain

We connect your domain, set up turnkey hosting and deploy your website on it. (Xsort servers meet European Tier 3 quality standards)

14

Basic SEO optimization

We register your site in search engines (Google, Yandex) and making the basic seo-optimization.

15

Site instructions

We are preparing instructions for working in the admin panel of the site and developing the entire project.

16

Delivery of the project and final payment

The next stage is the signing of the certificate of completion and payment of the remaining amount for the project.

17

Access transfer

The customer receives all the data and passwords of the project.

18

Support and maintenance

We provide the Customer with 1 month of technical support. support, during which we check all the bugs found by the Customer for free and fix them. After, the Customer acquires the required number. hours of tech. support, for further product development.

Write the word "Secret" to support@xsort.md now and get a discount on the development of the Technical Specification doc. 🤪
