

Letter of Recommendation

Our company is the official representative of Goodyear in the Republic of Moldova. We are professionals in our field, therefore we cooperate only with highly qualified specialists. Our joint work with Xsort Web Studio started more than 5 years ago. They are talented and creative people. They have completed more than one successful Internet project for us. Constantly are in touch and quickly responds to all our wishes.

One of our projects was long-term and energy consuming one, since it involves a complex task, and most importantly that they start with its development from scratch, based on ideas only. The main task was to create an online store that would be a convenient portal for our users, and for our employees it became a project management and document management system.

Among other things, this project has been constantly developing and continues to grow today, and therefore requires permanent improvement, updating, application of the latest technologies, innovative ideas. Specifically on this, we can always rely on the specialists from *Xsort*. The team supports and implements technically all our ideas: from the selection modules, filters on the site to the integration of the nomenclature base with our internal systems based on MS Access, 1C, logging of the price history, the formation of separate accesses with the special rights for our wholesalers. For us, such criteria as high qualification personnel, fast and efficient work, the embodiment of innovative ideas and the proposal of their own ideas regarding the technical part and optimization of the work as a whole were important. All our requirements were fully consistent with the company *Xsort Web Studio*.

We would like to express special gratitude to the CEO of the company Alexandr Cernisiov, who distinguished himself as a high-level professional, who exercised control at all stages of project development, starting from negotiations and presentation of ideas, ending with a ready-functioning project. We can confidently recommend this company as a reliable partner for any innovative and modern, from a technical point of view, projects and look forward to further cooperation with them.

CEO: Haceaturean S.R.
